Canadian Data Report of Fisheries and Aquatic Sciences

These reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of Data Reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries management, technology and development, ocean sciences, and aquatic environments relevant to Canada.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was changed with report number 161.

Data Reports are not intended for general distribution and the contents must not be referred to in other publications without prior written clearance from the issuing establishment. The correct citation appears above the abstract of each report.

Rapport statistique canadien des sciences halieutiques et aquatiques

Ces rapports servent de base à la compilation des données de classement et d'archives pour lesquelles il y a peu ou point d'analyse. Cette compilation aura d'ordinaire été préparée pour appuyer d'autres publications ou rapports. Les sujets des Rapports statistiques reflètent la vaste gamme des intérêts et politiques du Ministère des Pêches et des Océans, notamment gestion des pêches, techniques et développement, sciences océaniques et environnements aquatiques, au Canada.

Les numéros 1 à 25 de cette série ont été publiés à titre de Records statistiques, Service des pêches et de la mer. Les numéros 26-160 ont été publiés à titre de Rapports statistiques du Service des pêches et de la mer, Ministère des Pêches et de l'Environnement. Le nom de la série a été modifié à partir du numéro 161.

Les Rapports statistiques ne sont pas préparés pour une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au haut du résumé de chaque rapport.

SUMMARY

This report provides yearly summaries of commercial catch statistics in pieces, and in weight (kilograms), for sockeye, coho, pink, chum and spring salmon by each and all gear types combined for British Columbia catch areas (Figure 1) for 1951 - 1982. Data provided herein updates an earlier report by Aro et al (1977) which summarized catch for the years 1965 - 1975 only. The catch data is summarized in a time series form to allow examination of any trends in the distribution of catches by area and gear type.

Commerical catches of the five species of Pacific salmon native to British Columbia are reported annually by the Canada Department of Fisheries and Oceans. Catches are reported by statistical areas, by time periods, by gear types in pieces and/or pounds (recently in metric tons). (British Columbia Catch Statistics, Department of Fisheries & Oceans, Pacific Region). Throughout the 1950's however, some species were only reported by weight (pounds).

Salmon catches for the years 1951 - 1955 were recorded in weight only for many statistical areas with spring salmon catches recorded in weight only for all areas until 1963. In order that analyses can be undertaken using either pieces or weight for all available catch years, average weights (Table 1) were used to convert the earlier catch information (1951 - 1963) from weight to pieces.

Catch data used for 1967 - 1981 are final edited statistics, prepared subsequent to the published British Columbia Catch Statistics reports for these years. The differences, if any were due to a reallocation of catches to the appropriate gears. The 1982 catch statistics included here are, however, preliminary; the final statistics were not available by time of publication. The data was compiled and tabulated using the Historical Salmon Commercial Catch Data System, developed recently by Wong (1983) for the Fisheries Research Branch in Nanaimo, B.C..

Table 1: Average Weight Conversion table for 1951 - 1962 Catches reported in weight (pounds) only.
